Achieving a Strong Laboratory Safety Culture

- Every instructional or research laboratory has safe operations
- Leaders encourage participation by all for achieving and improving laboratory safety
- Students, staff, and faculty members raise safety concerns because trust and respect are present
- Everyone is personally responsible for ensuring safe operations for every task, every time
- A questioning attitude is encouraged and learning never stops in our college
- Cutting-edge engineering requires cutting-edge safety
- Practicing the highest safety standards is consistent with the expectations of our corporate partners and employers
